

Block of the Month CCQ January 2009

Snow Gent'

This block makes a fun and contemporary snowman that has funny button eyes and mouth, with a carrot nose and assortment of hats. Add a ribbon to his hat and it will be perfect. You can even position the circle so that your snowman is peeking off of the fabric, or center it like this example. Put together with alternate blocks or sashing this will make a delightful winter quilt.

Use Notions: 1/2" strip for hat contrast, Black buttons for eyes and mouth

Directions: NOTE: Allow 1/4" seam allowance for appliqué

Step 1 Sew circle to background. Appliqué, fuse or sew to background using a method you prefer. Position the circle so that your snowman is peeking off of the fabric, or center it; make it to your specification

Step 2 Sew hat as an appliqué or fusible raw edge piece. The hats can be zany or serious. Make them in fun prints or black, and trim the hat however you wish. Our snowmen will each have a unique look.

Step 3 When your fabric is all in place and sewn or fused, add buttons for eyes and mouth.

Step 4 Stitch fusible down with invisible or matching thread, using a zig zag stitch.
